

EnerDynamic Hybrid Technologies Corp. Announces Proposed Securities for Debt Transaction

TORONTO, Jan. 4, 2018 /CNW/ - EnerDynamic Hybrid Technologies Corp. ("EHT" or the "Company") (TSX-V: EHT) is pleased to announce that it has reached an agreement to settle certain debt obligations owed to a certain creditor in the aggregate amount of \$100,000.00 through the issuance of 909,091 common shares of EHT to such creditor at a deemed price per share of \$0.11 (the "Securities for Debt Transaction").

The Company's decision to complete the Securities for Debt Transaction is intended to preserve its existing cash balances.

All securities issuable in connection with the Securities for Debt Transaction will be subject to statutory hold periods of 4 months and 1 day from the date of issuance in accordance with applicable securities law legislation. The Securities for Debt Transaction remains subject to the approval of the TSX Venture Exchange.

About ENERTEC

The EHT advanced ENERTEC Modular Wall and Roof System uses a proprietary skin and foam core that is stronger and more energy efficient than traditional wood or steel structures providing the highest ratings for energy efficiency. EHT works with its partners worldwide to erect the buildings on-site utilizing EHT staff and local crews. After installation, each structure can be furnished and finished to meet the customer's requirements including siding, tile, kitchens and bathrooms or segregated commercial rooms. The finished wall product can be shipped on pallets and delivered via rail, truck or water in standard formats.

At the core of the ENERTEC product line is the ENERTEC Embedded Solar Roof Module. Solar cells can be embedded in a proprietary fire proof skin resulting in substantial cost savings by eliminating heavy glass panels and aluminum racking required for traditional solar panels. Two barriers to greater adoption of solar energy are weight limitations of the roof on which solar panels could be deployed and onerous shipping and labour costs. A lighter product at a better price point will open a larger market for solar due to the faster return of capital investment especially for rural and remote users looking to go off-grid. Furthermore, the entire EHT embedded solar roof becomes a massive solar panel capable of producing significantly more energy than the home requires, allowing the structure to then become an important source of power for the local micro grid or large battery storage systems.

About EnerDynamic Hybrid Technologies

EHT delivers proprietary, turn-key energy solutions which are intelligent, bankable and sustainable. Most energy products and solutions can be implemented immediately wherever they are needed. EHT stands above its competitors by combining a full suite of solar PV, wind and battery storage solutions, which can deliver energy 24 hours per day in both small-scale and large-scale format. In addition to traditional support to established electrical networks, EHT excels where no electrical grid exists. The organization supplies advanced solutions for various industries in combination with energy saving and energy generation solutions. EHT's expertise includes the development of module structures with full integration of smart energy solutions. These are processed through EHT's production technologies into attractive applications: modular homes, cold storage facilities, schools, residential and commercial out buildings and emergency/temporary shelters.
